MERN & Next.js developer with 4+ years of experience building scalable full-stack web applications. Specialized in React, Node.js, MongoDB, and responsive UI design. Delivered multiple client projects across e-commerce, event booking, dashboards, and AR-based applications.

Work Experience

Junior Developer – WDC (2021 – 2024)

- Assisted in developing and maintaining web applications using React.js, Next.js, and Node.js.
- Gained experience in responsive UI, API integration, and MongoDB backend solutions.
- Contributed to e-commerce and event management projects with senior developers.

Education

BS Information Technology – University of Sargodha (Graduated: 2025)

Projects

One up AI Strategies Platform - AI-powered strategy platform for data analysis, decision optimization, and smarter business growth.

Virtual Interior Decor App - Web-based AR app where users preview 3D furniture in real spaces, customize finishes, and share layouts.

New Kendall Party Rental - Event booking platform connecting users with trusted local vendors for weddings, parties, and events.

Advisory Email Service - Next.js email service with React templates, queue processing, API docs, and webhook integration.

Naami Dashboard - Restaurant booking & management dashboard with table reservations, insights, and booking control.

E-Commerce Store - Online shopping platform with secure checkout, product filtering, and smooth user experience.
